NtM No. 01 of 2024

Local Notice to Mariners - Rocks at Dunbar Harbour Slip Way

All harbour users should be aware of rock placed temporarily on both sides of the Victoria Harbour slip way.

The rock will be moved across the middle, Broadhaven Harbour, during low tides in April and May to repair the breakwater.

Anyone using the slipway should take care at high water when the rock is not visible. Also be aware of heavy construction machinery that may be operating around the slip way at low water.

Contact the Harbour Master 07958 754858 if you need to check specific arrangements for your launch.
