

DUNBAR HARBOUR TRUST

Fiona Kibby

Harbour Master

Putting Dunbar Harbour at the heart of the community

Dunbar Harbour Trust

Mission

- Operate the harbour for the benefit of all its stakeholders including harbour users and the local community
- Maintain and improve the harbour facilities
- Attract new uses of the harbour and new business to the harbour
- Advance public education concerning the harbour
- Provide facilities in the interest of social welfare for recreation and leisure-time occupation

A Community Project

- Restoring a wooden, traditionally (clinker) built sailing boat called “Pearl”
- Getting the community involved through each stage of Pearl’s journey back to the sea.
- An opportunity for Dunbar Harbour to offer the community a grass roots project. Aimed at putting the harbour at the heart of the community and offering an inclusive project that everyone, all generations, abilities and with different life experiences can play a part in.
- Once restored, The Pearl can offer everyone a chance to get out on the water, learn to sail and maintain her, and to enjoy being part of a seafaring community.

- A wooden boat donated to the harbour
- Needs some tlc but is an achievable restoration project
- Provides a community sail training boat

Project Pearl

Project Phases

Volunteer recruitment, and structure of the project team

Building a cradle for safe working

Initial assessment and restoration

Back to the water
